Technical Skills

- HTML, CSS
- JAVASCRIPT
- JAVA
- REACT JS
- GIT, GITHUB

Soft Skill

- Observation
- Decision making
- Communication
- Multi-tasking

Education Background

- KPR INSTITUTE OF ENGINEERING AND TECHNOLOGY
B.E - ECE
2020 - Present
- GREEN GARDEN MAT SCHOOL
HSL
2018-2020
- SRI VENKATESHWARA MAT SCHOOL
SSLC
2018

About Me

As a frontend developer. I specialize in creating user-friendly interfaces using HTML, CSS, and JavaScript. I'm proficient in modern frameworks like React.js. I prioritize clean and maintainable code to ensure smooth functionality. I'm a great communicator and enjoy collaborating with designers and backend developers.

Projects

V-Guard Learning Module

This is my first consultancy project given by V-Guard Industries to create a learning module for their recruiting process. We completed this project using WordPress, XAMPP, and also incorporated React.js as an alternative solution.

Weather API Fetching

It involves making HTTP requests to the API, receiving JSON data in return, and parsing it to extract relevant information such as temperature, humidity, and forecasts. This enables developers to integrate real-time weather updates into their applications.

Personal Portfolio

I built my personal portfolio using Bootstrap, creating a visually appealing and responsive design. By utilizing Bootstrap's pre-built components and responsive grid system, I ensured a consistent and professional look across devices. It showcases my skills, projects, and experiences in an organized and user-friendly manner.

Work Experience

Frontend developer - Weblicious

March - 2023
Coimbatore, Tamilnadu

Project Trainee - V guard Industries

October - 2022
Perundurai, Erode
