ABOUT

Frontend Developer with 1 year of experience at Sutherland , Webilicious and passionate about building seamless and user-friendly web experiences. A dedicated team player who thrives on solving problems and enhancing web usability for faster, more efficient access. Skilled in practical projects and real-world problem-solving, eager to contribute meaningfully to the world of frontend development.

EXPERIENCES

Associate

Sutherland

February 2025

Driving impactful digital solutions in a fast-paced MNC environment, delivering excellence in software development at Sutherland.

Frontend developer

Webilicious

March 2023

As a Frontend Engineer at Webilicious during my early career, I gained foundational knowledge and hands-on experience in front-end web development.

Project trainee

V-guard Industries

October - 2022

As a Project Trainee at V-Guard, I had the opportunity to work on various projects and gain practical experience in project management and related tasks.

PROJECTS

V-Guard Learning Module | V-guard

In my first consultancy project for V-Guard Industries, we created a learning module for their recruiting process using WordPress, XAMPP, and integrated React.js as an alternative solution.

Alcami Elements Webpage | Freelance

Developed a responsive e-commerce site for Alcam Elements using HTML and CSS as a freelance project for Cube Company. Included product displays, subscriptions, reviews, and newsletter signup to boost engagement and sales.

Customer care Dashboard | Sutherland

Developed a responsive Customer Support Dashboard using React.js, Redux, and REST APIs in an MNC environment. Enabled efficient ticket management, real-time updates, and advanced search with secure role-based access control.

SKILLS

Frontend skills: HTML, CSS, JavaScript, React JS, Node JS, RestAPI, Typescript, Express JS, DevOps Pipeline, SQL, Mongo DB

Version control: Git and Github

Soft skills: Observation, Teamwork, Decision Making, Communication
